

Successful Managers & Supervisors Use EAP

We have a mutual goal– that of fostering a workforce that performs with success and harmony.

- ◇ INVEST EAP is eager to have close relationships with your managers, supervisors and HR professionals.
- ◇ EAP can be a sounding board and 'first call' whenever an issue is proving difficult to resolve.
- ◇ The desired outcome– a successful, happy work environment– can best be achieved when problems are identified early and EAP resources are offered proactively, before they become intractable.
