

# UVM Drone Services and Aerial Images of Flooding

July 29, 2023

The University of Vermont Spatial Analysis Lab has drone teams available to survey flooding and damage. There is no charge for this service. Email [ADM.2023floods@vermont.gov](mailto:ADM.2023floods@vermont.gov) to request a drone survey. Requests will be evaluated by the Vermont Agency of Digital Services. Find a fact sheet about UVM's drone support at <https://go.uvm.edu/tmuzx>.

The Vermont Center for Geographic Information (VCGI) has created a flood imagery web app using aerial photos collected by UVM, VTrans, volunteers, and the Civil Air Patrol. See the map at <https://2023flood.mapvt.com>. This map can be useful for helping determine the extent of flood damaged areas.
